# MetricsHub®

MetricsHub provides **real-time performance and health monitoring** for on-premises and hybrid IT infrastructure.

Designed for IT administrators, it offers actionable insights to **maximize uptime, optimize resources, reduce costs, and lower carbon footprint.**
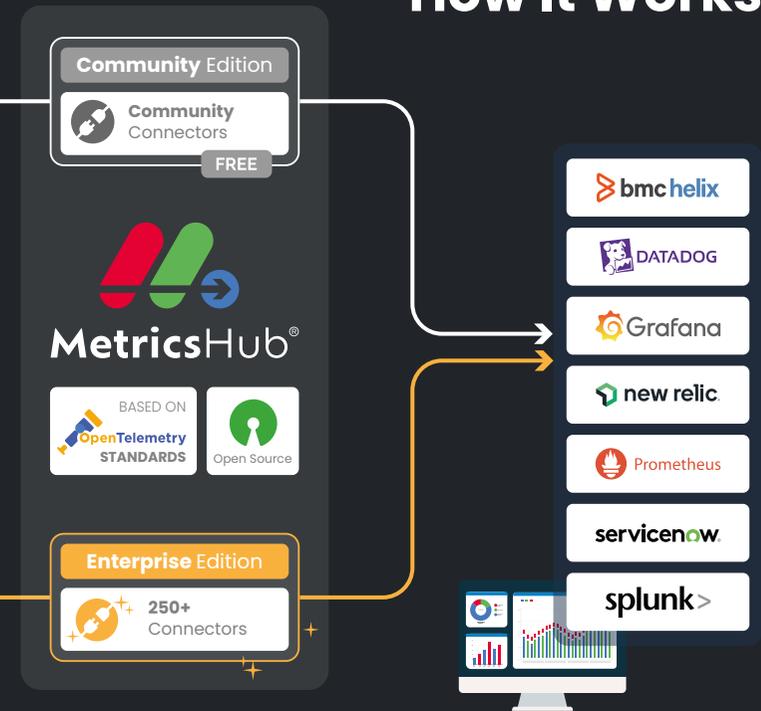

Suitable for:
• Data centers
• Enterprise IT environments
• Hybrid cloud infrastructure

How It Works

Applications/Web APIs On-Prem & Cloud

IoT

Windows   Linux   APACHE™

NVIDIA   DELL PowerEdge   HP ProLiant   IPMI

*or other Open-Source technologies

Physical Server
CISCO   DELLEMC   FUJITSU
HITACHI   hp   HUAWEI
IBM   ORACLE   •••

Switches
BROCADE   CISCO

SAN / NAS
DELLEMC   hp   HITACHI
HUAWEI   IBM   NetApp
nimble storage   Pure Storage   •••

Key Benefits

• **Extensive monitoring coverage**
• **Unified data collection**
• **Reduced downtime**
• **No vendor lock-in**
• **IT energy saving**

Core Features

Real-Time Infrastructure Monitoring
Track critical server metrics like CPU, memory, disk usage, network, storage capacity and performance in real-time.

Predictive Alerts and Custom Thresholds
Set custom thresholds and receive automatic alerts to prevent system failures and downtime.

Cross-Vendor Compatibility
MetricsHub supports multi-vendor and hybrid environments, offering seamless monitoring for diverse infrastructures.

Comprehensive Dashboards
Get access to customizable dashboards that provide deep insights into server and storage performance, resource usage, and emissions.
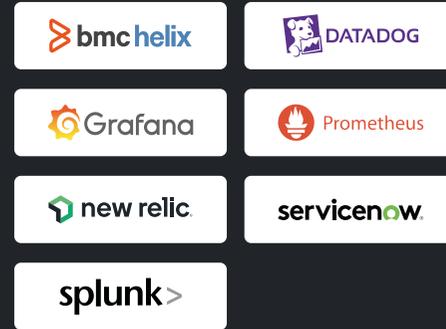

Historical Data & Trend Analysis
Analyze performance data over time to optimize resource allocation and improve operational efficiency.
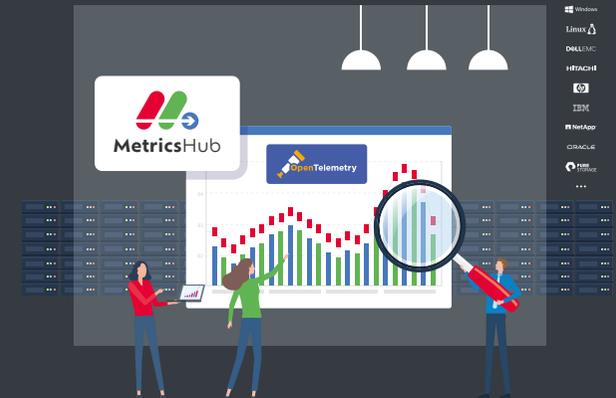

Supported Platforms

100+ platforms, from the oldest to the latest

BROCADE · CISCO · DELL EMC · EATON

FUJITSU · HITACHI · hp · HUAWEI

IBM · JUNIPER NETWORKS · Lenovo · nimblestorage

NVIDIA · NEC · NetApp · ORACLE

PURE STORAGE · PROXMOX · Raritan (A brand of legrand) · vmware

Integrates with the **major observability plaforms**

bmc helix · DATADOG · Grafana · Prometheus · new relic · servicenow · splunk>
